## THE ISEKAI PRODUCER

In 2020, as the world ground to a halt, Na5h picked up a DAW for the first time. Self-taught and steadily refining his craft, he builds music to move — upbeat, nostalgic, and unmistakably alive.

# THE STORY

## ORIGIN

Na5h's story begins in 2020 — not at a club, not in a studio, but in the strange suspended stillness of a pandemic. The world stopped. Na5h started.

## THE CRAFT

Picking up a DAW for the first time with no formal training, he turned isolation into obsession. What started as escape became identity. Self-taught across every element — from sound design to arrangement — Na5h has been quietly building since.

## THE SOUND

Drawing from the golden era of electronic music, Na5h blends the French touch swagger of early-2000s Daft Punk, the warmth of classic house, the rhythm of Afro house, the pulse of techno, and the nostalgic glow of synthwave and nu disco. The result: music built to move.

## THE PERSONA

The 'isekai' framing is deliberate — an alter ego who fell into music from another world, levelling up in public. Hospitality and photography by day. Producer by night. The journey is part of the art.

## TODAY

Eight releases in and available on Bandcamp and all major streaming platforms, Na5h is only just getting started. Nairobi's alter ego is warming up.
